

CANNABIS MICRO GROW-OP

Highlights:

- 12,000 sq. ft. of growing space in six rooms.
- Currently harvests approximately 70 – 80 lbs per month from four grow rooms. This will increase to 105 – 120 lbs per month when fully utilized.
- Automatic watering.
- Quality grow lights.
- 800 amp/600 V power.
- Comes with 41 acres and a five-bedroom house on property.

This is an excellent opportunity for a company with cannabis retail locations to produce their own craft cannabis with their own label.

6,000 sq. ft. provides four growing rooms that are currently producing 70 – 80 lbs of product monthly. Another 6,000 sq. ft. is in the basement and is almost ready to begin operations. An additional 2,600 sq. ft. can be converted into a processing area to package the product as well as house a lab for extracts.

The facility can be operated with three people and has top-quality growing equipment.

800-amp service ensures that there is sufficient power for the lights, AC units, and humidifiers/dehumidifiers. Water is available from a well on the property.
